

Banana Ape Garden

WHITE PAPER

SEND IN THE APES!

Story

Banana Ape Garden is a Defi Game on the Avalanche Blockchain, our vision is to build engaging projects and create a reputable brand. A place to learn, earn and grow without the fear of going on a shady adventure, in the wild west of the Defi Financial world.

There are always new Defi projects on offer as new mechanisms and concepts shift the market trends. Banana Ape Garden is the initial plan to build secure and trustable decentralized applications where users can invest in peace, without the fear of being rugged. Banana Ape Garden (BAG), a coin that is designed to participate in the ecosystem we aim to build. The recommended exchange for trading Banana Ape Garden (BAG) is TraderJoe.

It is important to always cross-check the token address against the BAG address provided on bananaapegarden.com, to ensure you are buying into the right tokens and not the scams. After you bought your BAG you can participate in the Defi game. As more people enter the ecosystem and start playing our game, the more positive this will be for the price of BAG.

Defi gamification is what we do, Ape Army will fork decentralized applications on different popular chains. Banana Ape Garden is a fork of the famous "Fisherman Joe" on Binance Smart Chain.

We will build and improve upon forks that already have been proven to be popular. Most of these applications do have features that lock up part of the supply, this would be perfect for stabilizing the price of BAG and prevent any big sells happening.

Induction

INSTRUCTIONS:

One day the hungry ape army went to the Banana Ape Garden to collect some bananas. When they got there they found out that the bananas had been stolen. They saw farmers driving off with their precious bananas.

Filled with rage the Apes raise an army to collect bananas as fuel, as they prepared for war!

More APES will Lead to more bananas... SEND in the APES!

Each Ape raised, yields delicious bananas which can be sold for \$BAG. The more apes you have, the higher the daily yield of bananas. The bananas you receive can be used to raise more Apes and compound your earnings or be sold.

To get started with the game:

- 1. After you bought some \$BAG on TraderJoe. Press "APPROVE", then fill in how many \$BAG worth of APES you want to raise and click "RAISE APES".**
- 2. The game will start and your APES will start earning bananas for you straight away.**
- 3. Sit back, relax and see the amount of bananas GROW!**

9% (9,000,000): partnership, promotions, marketing, and liquidity management
81% community (81,000,000)

4.

Tax & Fees: . → There are taxes of 12% on every BAG transaction. 10% of the taxes directly go into the liquidity to support the price. → Note that there is a 2% Dev fee on all actions you take in the game.

Team & Goals

1.

How is Ape Army organized?

Banana Ape Garden is a decentralized working hub for people with a vision to come together and build the future of global finance. Smart contract devs, strategists, designers, and artists - anyone can join and contribute (no matter your nationality, sex, or views). By investing in Banana Ape Garden, you are investing in the idea that a group of highly technical individuals can safely, securely and creatively beat the farmers of traditional finance. The era of decentralized finance is here.

2.

Why is the project anonymous?

We believe in peoples right to privacy, and people/ projects should be judged by how they perform. In future we are open to partial doxxing of the team, though we are aiming to build our credibility and brand. By having a team that operates anonymously, even amongst itself, we can focus on providing the best experience for our users. We urge anyone with concerns that anonymity diminishes credibility to join our community, watch and participate how we work by our actions.
